

old

A schematic diagram of a circular device. It features a central core (23) and an outer ring (25). The ring has four circular components (61) and a rectangular component (51) with a coiled wire (53). Arrows (47) point towards the ring from the left, and arrows (43) point away from the ring at the bottom. Labels 27, 45, 63, and 65 indicate specific regions or components.
